

# Best Global AC Voltage Stabiliser Manufacturer 2023

Mains voltage control specialist, Sinalda UK offers voltage stabilisation and power conditioning systems. Tried, tested, and proven in countries around the world for over 30 years, the company's products are deployed in some of the harshest environments on the planet. We take a look at the family-run company in more depth with director, Daniel Dover.

In today's fast-paced environment, reliable electrical equipment and technology are paramount. Ensuring a consistent and stable power supply is crucial for seamless operations. That's where AC voltage stabilisers come into play. Designed to regulate and maintain a steady voltage level, these innovative devices stabilise fluctuations from the power grid. By safeguarding sensitive electronic equipment and appliances from voltage variations, voltage stabilisers protect your workplaces and critical infrastructure from potential disruptions, data loss, and costly downtime.

Sinalda UK is one of the world's leading specialists in AC voltage stabilisers and power line conditioning. The company works with businesses across the globe to provide state-

of-the-art power control solutions. Sinalda is renowned on the world stage for its tailored approach and its clean, stable, guaranteed voltage solutions. The company collaborates with major corporations and small businesses in a wide selection of industries and market sectors.

Daniel says, "By delivering quality products and services, we've consistently grown our client base year after year. Today we are an approved supplier to many well-known major international corporations and public organisations. Our emphasis is always on building and maintaining strategic and long-lasting relationships with our customers."

You'll find customers of Sinalda in over 120 countries, supported by its ever-growing base of local resale partners and agents. With offices

and a distribution hub in Bedford, UK, Sinalda has accredited manufacturing operations, coordinated through Hong Kong, in Taipei, Taiwan, and Shenzhen, China.

We ask Daniel about the company's unique selling point. He explains, "The products offered by Sinalda are quality solutions. We give the same attention to detail in the delivery of pre-sales and after-sales support to all our customers. Our vast experience and commitment to solving power supply problems mean there's no team like Sinalda anywhere else in the world."

The customer-centric team at Sinalda prides itself on its responsive and supportive service.

Daniel tells us, "Our team are all highly skilled and extensively trained. Having a complete understanding of each client's requirements is essential. It enables us to tailor a solution that provides everything they need. Our staff are among the most trusted and respected professionals in the industry. They're always looking for ways to improve our services and the customer experience. Our innovation team seeks out and develops new and improved products."

Recent occurrences such as extreme adverse weather conditions, security challenges, and the global energy crisis have made power shortages and irregularities all the more likely. As businesses begin to understand the likelihood of these risks, demand for Sinalda's products and services is set to increase.

Daniel says, "The need for our products and solutions is becoming clearer and more financially justifiable for many. Reliable products, solutions, and support during these periods are exactly what's required and precisely what Sinalda provides."

Now looking to the bright future ahead, the company's goal is to strive to meet the ever-increasing demand for its services.
